

Year Two Habitats Summer Term

Learning Sequence:

- Identify between things that are living, dead or have never been alive.
- Investigate the microhabitat of woodlice and how they get all they need to survive.
- Identify and name a variety of plants and animals in their habitats, including micro habitats.
- Identify a range of habitats around the world, including big and micro habitats.
- Match a range of animals to their habitat.
- Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants.
- Notice how animals and plants depend on each other by looking at simple food chains.

Key Vocabulary

Habitat	A habitat is the natural place something lives. It provides everything the living thing needs to survive such as food, water and shelter.
Microhabitat	Is a very small habitat found in places such as under rocks and leaves or on the branch of a tree. The microhabitat has everything needed for survival.
Depend	Many living things in a habitat depend on each other. They need each other for different things.
Survive	To stay alive.

Final Outcome: Produce a poster reminding people to care for the world and the environment and to look after the habitats of living creatures

Key Skills:

- Explore and compare the differences between things that are living, dead, and things that have never been alive.
- Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.
- Identify and name a variety of plants and animals in their habitats, including micro habitats.
- Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.
- Observe closely, using simple equipment.
- Gather and record data to help answer questions.
- Use their observations and ideas to suggest answers to questions

Key Facts and Knowledge:

- Living things need **food**, **shelter** and **water** to survive.
- A habitat is a living things' natural 'home'.
- It provides all the things it needs to survive.
