

Summer 1 Year 3 Branching Databases

Vocabulary

Branching database – A way to sort information by asking questions that are normally answered ‘yes’ or ‘no’.

Data – Facts and statistics collected together for information.

Database – A collection of data organised in such a way that it can be searched, and information found easily. Database usually refers to data stored on computers.

Question – Something that is asked or written to try and gain information.

mash

Key Resources

Sequence of Learning

To sort objects using just ‘yes’ or ‘no’ questions.

To complete a branching database using 2Question.

To create a branching database of the children’s choice.

National Curriculum Links

- Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.
- Use sequence, selection, and repetition in programs; work with variables and various forms of input and output.

Key Images

Open, save and share files.

Give the database a name.

Title

Add a question to begin to sort the information.

Key Questions

- What is meant by data?
- What is a database?
- What is a branching database?
